Introduction

Project New Kanto, or PNK, is the complete and total remastering of the current Pokemon region of Kanto. Kanto is the first region to be explored by Ash in the anime, and the first place you go in the game, Pokemon Hall of Fame. The original maps from the original games were very small and petite, you could walk from one side of a city in just a few strides. The aim of PNK is to vastly expand the gameplay with large, realistic and geologically correct maps. PNK will then introduce [Anime Exclusive](#) maps, such as ones that May, from the anime, travel to for Pokemon contests.

Progress

Progress is currently on hold.

Venom 12 - Tilesets

Help?

I need very little help on the project, however, i do need lots of tilesets and i could use a few extra helpers for things like caves.
